About the organizing Institutions:

Kryvyi Rih National University is one of the largest education institutions of the central region of Ukraine for qualified personnel training in metallurgical, mining, engineering and technological specializations. Scientific subjects performed by the university aimed to increasing the efficiency of production and control processes, power saving and environmental protection.

Automation, Computer Science and Technology Department

ACST department trains specialists in computer science, automation and computer-integrated technologies. The main educational and scientific areas are: information support for decision making, development and implementation of process automation and mechatronics systems.

‘Research Culture Society’ is a Government Registered Scientific Research organization. Society is working for research community at National and International level to impart quality and non-profitable services. Scientific Research Association is a group of scholarly academicians and researchers.

Co-sponsor by: Institute of Science and Technology, Eurasian University & Scientific Research Association.

Objective of the International Conference: Our main objective is to promote scientific and educational activities towards the advancement of common citizens life by improving the theory and practice of various disciplines of science and engineering. To organize lectures by scientists and experts and to disseminate their ideas and concepts among the science and technology community. Provide the delegates to share their new ideas and the application experiences face to face. The aim of the conference is to provide a interaction stage for researchers and practitioners from academia and industries to deal with state-of-the-art advancement in their respective fields.
